Minor Specializations

I. Computational Intelligence

CSE 4053: Artificial Intelligence
ICT 4031: Computer Vision
ICT 4032: Machine Learning
CSE 4054: Soft Computing Paradigms

II. Computer Graphics and Visualization

CSE 4051: Augmented and Virtual Reality
ICT 4033: Computer Graphics
ICT 4031: Computer Vision
CSE 4052: Digital Image Processing

III. Data Analytics

ICT 4034 : Big Data Analytics
ICT 4035 : Information Retrieval
ICT 4032 : Machine Learning
ICT 4036 : Semantic Web

IV. Software System Design

ICT 4037 : Advanced Software Engineering
ICT 4038 : Software Architecture
ICT 4039: Software Project and Quality Management
ICT 4040 : Software Construction

V. Material Science

PHY 4051: Physics of Low Dimensional Materials
PHY 4052: Physics of Photonic & Energy Storage Devices
CHM 4051: Chemical Bonding
CHM 4052: Chemistry of Carbon Compound

VI. Business Management

HUM 4051: Financial Management
HUM 4052: Human Resource Management
HUM 4053: Marketing Management
HUM 4054: Operation Management

VII. Computational Mathematics

MAT 4051: Applied Statistics and Time Series Analysis
MAT 4052: Computational Linear Algebra
MAT 4053: Computational Probability and Design of Experiments
MAT 4054: Graphs and Matrices

Program Electives

ICT 4045: Cloud Computing
ICT 4046: Deep Learning
ICT 4047: Game Theory with Computer Applications

ICT 4048: High Performance Computing
ICT 4049: Human Computer Interaction
ICT 4050: Internet of Things
ICT 4051: Natural Computing
ICT 4052: Neural Networks and Fuzzy Logic
ICT 4053: Pattern Recognition
ICT 4054: Social Network Analysis
ICT 4055: Software Reliability

Open Electives

ICT 4301: Computer Graphics and Animation
ICT 4302: Design and Development of Web Applications
ICT 4303: Fundamentals of Data Structures and Algorithms
ICT 4304: Machine Learning Tools and Technologies
ICT 4305: Networking with TCP/IP
ICT 4306: Cyber Security
ICT 4307: Game Theory And Application

THIRD SEMESTER

MAT 2155: ENGINEERING MATHEMATICS-III [2 1 0 3]

Boolean Algebra: Partial ordering relations, Poset, Lattices, Basic Properties of Lattices. Distributive and complemented lattices, Boolean lattices and Boolean Algebra. Propositional and Predicate Calculus: Well-formed formula, connectives, quantifications, Inference theory of propositional and predicate calculus. Elementary configuration: Permutations and Combinations, Generating function, Principle of inclusion and exclusion Partitions, compositions. Ordering of permutations: Lexicographical and Fikes. Graph theory: Basic definitions, Degree, regular graphs, Eulerian and Hamiltonian graphs, Trees and Properties, Center, radius and diameter of a graph, Rooted and binary trees, Matrices associated with graphs, Algorithms for finding shortest path, Group theory: Semi groups, Monoids, Groups-subgroups, Normal Subgroups, Cosets, Lagrange's Theorem, Cyclic groups.

References:

2. Trembaly J.P. and Manohar R, Discrete Mathematics Structures with application to computer Science, Tata McGraw Hill, 2012.
3. Page E.S. and Wilson L.B., An Introduction to Computational Combinatorics, Cambridge Univ. Press, 1979.
4. Narasingh Deo, Graph theory with Applications to computer science, PHI, 2012.

ICT 2153: DATA STRUCTURES [3 1 0 4]

Introduction, Programming fundamentals, Stacks, Queues and their applications, Sparse Matrix, Pointers and dynamic memory allocation, Linked Lists: Singly linked lists, Dynamically Linked Stacks and Queues, Polynomial representation and polynomial operations using singly linked list, Singly Circular Linked List, Doubly Linked Lists, Trees: Binary trees, Heaps, Binary Search Trees, Threaded binary trees, Graphs: Depth First Search, Breadth First Search, Connected components, Spanning trees, Sorting and searching Techniques.

References:

2. Weiss M. A., Data Structures and Algorithm Analysis in C++ (3e), Pearson Education, 2009.
3. Michael T. Goodrich, Tamassia R., Mount D., Data Structures and Algorithms in C++ (2e), John Wiley & Sons, 2011.
4. Horowitz E., Sahni S., Anderson-Freed S., Fundamentals of Data structures in C (2e), Silicon Press, 2008.

ICT 2154: DIGITAL SYSTEMS [3 1 0 4]

Introduction, Simplification of Boolean functions - K-map and tabulation method, NAND and NOR implementation, Combinational logic- Design of Adders/Subtractors, Binary Parallel adder[7483], Carry Look ahead Adder [74182], Multiplier using 7483, BCD adder, Magnitude Comparator [7485], Decoder [74138,7442], Combinational logic circuit design using decoders, Encoder [74148], Multiplexers [74157, 74153], Combinational logic circuit design using multiplexers, De Multiplexers, ROMs and Programmable Logic Arrays, Sequential logic – Asynchronous and Synchronous counters, Synchronous counter design, Shift registers, Shift register counters, Analysis and design of clocked sequential circuits, Memory Devices - RAM, ROM, PROM, EPROM, EEPROM, PLD.

References:

1. Mano M.R.,Kime C.R.,Martin T., Logic & Computer Design Fundamentals (5e), Prentice Hall India, 2015.
2. Tocci R.J., Widmer N.S., Greegory L.M., Digital Systems: principles and Applications(12e), Pearson Education India, 2017.
3. Wakerly J.F., Digital Design Principles and Practices(4e), Pearson Education, 2014.

ICT 2155: OBJECT ORIENTED PROGRAMMING [3 1 0 4]

Introduction to the java programming language, Importance of Java in the internet, Data types, Variable and arrays, Type conversion and casting, Operators and control statements, Classes and inheritance, Packages and interfaces, Collections Framework - array list, vector and dictionary, String handling, Exception handling, Thread concepts – synchronization, inter thread communication, Input/output – File:file input stream, File output stream, Random access files, Reader, Writer, Serialization, Serializable, Object input stream, Object output stream, Swings - swing fundamentals, Introduction to event handling.

References:

1. Schildt H., Java-The Complete Reference (9e), Tata McGraw-Hill 2014.
2. Horstmann C. S. & Cornell G., Core Java Volume I – Fundamentals (9e), Prentice Hall 2013.
3. Horstmann C. S. & Cornell G., Core Java Volume II– Advanced Features(9e), Prentice Hall 2013.

ICT 2156: PRINCIPLES OF DATA COMMUNICATION [3 1 0 4]

Introduction to Data Communication, Signals, Basic properties of data communication system, Nyquist rate, Shannon Capacity, Signal encoding and Tx and Rx models, Modulation schemes. Properties of Media and digital transmission systems, wired and wireless medium, Error detection and correction, Block codes, CRC, Hamming code, Stop and wait flow control, Sliding window flow control, ARQs, HDLC, Multiplexing, Media Access Sublayer and LAN, Approaches to sharing transmission medium, Random access protocols, Token passing protocols, IEEE LAN standards, Bridges, MAN, FDDI.

References:

1. Stallings W., Data & Computer Communications (9e), Pearson Education Inc., Noida, 2017.
2. Forouzan B., Introduction to data communication & networking (4e), Tata McGraw Hill, New Delhi-2014.
3. Garcia A. L., Widjaja I., Communication Networks (2e), Tata McGraw Hill, 2011.

ICT 2162: DATA STRUCTURES LAB [0 1 3 2]

Application using arrays, String operations, Class concepts: Creation, Initialization using constructors, Applications of stacks, Arithmetic expression conversion and evaluation using stack, queues, Sparse matrix representation, Transpose of a sparse matrix, Singly linked lists and applications, Circular linked lists, Doubly linked lists, polynomial addition and multiplications using circular linked lists, Binary Tree: creation, deletion and traversal techniques, Binary search tree operations, sorting and searching techniques.

References:

1. Horowitz E, Sahni S., Mehta D., Fundamentals of Data Structures in C++ (2e), Golgotha Publications, 2008.
2. Weiss M. A., Data Structures and Algorithm Analysis in C++ (3e), Pearson Education, 2009.
3. Horowitz E., Sahni S., Anderson-Freed S., Fundamentals of Data structures in C (2e), Silicon Press, 2008.

ICT 2163: DIGITAL SYSTEMS LAB [0 1 3 2]

Verification of Boolean algebra and De Morgan theorems, Simplification of Boolean expressions using K-maps, Combinational logic circuit implementation – Binary parallel adder [7483], BCD adder, Multiplier, Code converter, Comparator, 3 to 8 decoder [74138], Magnitude comparator [7485], Multiplexers [74151, 74153, 74157] ICs, Sequential logic circuits- Flip flops, Conversion of flip-flops, Analyzing timing diagram using output waveforms, Asynchronous and Synchronous counters [7490, 7493, 74193 ICs], Shift registers, Shift register counters, Sequence generators, Sequence detectors.

References:

1. Mano M.R., Kime C.R., Martin T., Logic & Computer Design Fundamentals (5e), Prentice Hall India, 2015.

3. Wakerly J.F., Digital Design Principles and Practices (4e), Pearson Education, 2014.

ICT 2164: OBJECT ORIENTED PROGRAMMING LAB [0 0 3 1]

Programs based on the following concepts: Data types, Type conversions, Operators, Control statements, Classes, Inheritance, Polymorphism, Threads, Interfaces and abstract classes, Collections: arraylist and vector, String handling, File handling, Swings.

References:

1. Schildt H., Java-The Complete Reference (9e), Tata McGraw-Hill 2014.
2. Horstmann C. S. & Cornell G., Core Java Volume I – Fundamentals (9e), Prentice Hall 2013.
3. Horstmann C. S. & Cornell G., Core Java Volume II– Advanced Features (9e), Prentice Hall 2013.

FOURTH SEMSTER**MAT 2256: ENGINEERING MATHEMATICS-IV [2 1 0 3]**

Basic Set theory, Axioms of probability, Sample space, conditional probability, total probability theorem, Baye's theorem One dimensional and two dimensional random variables, mean and variance, properties, Chebyshev's inequality, correlation coefficient, Distributions, Binomial, Poisson, Normal and Chi square. Functions of random variables: One dimensional and Two dimensional, F & T distributions, Moment generating functions, Sampling theory, Central limit theorem, Point estimation, MLE, Interval estimation, Test of Hypothesis: significance level, certain best tests; Chi square test.

3. Hogg and Craig, Introduction to mathematical statistics, (6e), Pearson education, 2012.
4. Ross Sheldon M, Introduction to Probability and Statistics for Engineers and Scientists, Elsevier, 2010.

ICT 2255: COMPUTER NETWORK PROTOCOLS [4 0 0 4]

Introduction to Computer Networks: Definition, Network Layer, Network Layer services, Interfacing - Bridges, IP addressing, Subnetting and Supernetting, IPv6 addressing, Delivery, Forwarding, and Routing of IP Packets, Internet Protocol - Datagram, Fragmentation, Options, Checksum, Introduction to Routing Protocols, Interior and Exterior routing, Dynamic IP Routing Protocols - RIP, RIP Version 2, OSPF, Routing between peers – BGP, ARP and RARP, Internet Control Message Protocol, User Datagram Protocol, Transmission Control Protocol and Introduction to application layer, Domain Name System (DNS), DHCP, FTP, SNMP.

References:

1. Forouzan B. A., TCP/IP Protocol Suite (4e), Tata McGraw Hill 2017.
2. Tanenbaum A. S., Computer Network (5e), Prentice Hall of India Pvt Ltd 2013.
3. Forouzan B. A., Data Communications and Networking (5e), Tata McGraw Hill 2013.
4. Garcia L., Widjaja, Communication Networks (2e), Tata McGraw Hill 2004.

ICT 2256: COMPUTER ORGANIZATION AND MICROPROCESSOR SYSTEMS [3 0 0 3]

Microprocessor 8086 Architecture, Pin diagram, Modes of operation, Segmentation and memory addressing, Addressing modes, Assembler directives, Assembly language development tools, Instruction set, Stacks and subroutine, Macros and procedures, Assembly language programming, Interrupts, BIOS and DOS interrupts, Basic IO interfacing- 8255 Programmable Peripheral Interface, 8254 Programmable Interval Timer, 8259 Programmable Interrupt Counter, Computer Organization: Introduction, Execution Unit - Combinational shifter design, Adders, Arithmetic and Logic Unit design, Multiplication algorithms, Division algorithms., Control Unit- Introduction, Basic concepts, Hardwired and Micro programming approach, Memory Unit, Input & Output.

References:

1. Hall D.V., Microprocessors and Interfacing: Programming and Hardware (2e), Tata McGraw Hill, 2006,
2. Brey B.B., The Intel Microprocessors: 8086 to Pentium Pro - Architecture, Programming and Interfacing (8e), Prentice Hall of India, 2012

4. Rafiquzzaman M and Rajan C., Modern computer Architecture, Galgotia Publications Pvt. Ltd, 2012.

ICT 2257: DESIGN AND ANALYSIS OF ALGORITHMS [3 1 0 4]

Introduction, Graphs: Representation of graphs & Digraphs, Graph Search Methods: Breadth First Search, Depth First Search, Shortest path algorithms, Algorithm Design Techniques: The Greedy Method, Divide and Conquer, Dynamic Programming, Tree-Binary search trees, Heap Trees, Height Balanced Tree, B Trees, B+ trees. Hashing: hash functions, collision resolution techniques, Heaps and priority queues, P, NP, NP-Complete and NP hard problems, Approximation Algorithms.

References:

1. Cormen T H., Leiserson C. E., Rivest R. L., Stein C., Introduction to Algorithms (3e), Prentice-Hall India, 2009.
2. Sahni S., Data Structures, Algorithms and Applications in C++ (2e), Silicon Press, 2005.
3. Weiss M., Data Structures and Algorithm Analysis in C (3e), Pearson Education, 2009.

ICT 2258: OPERATING SYSTEMS [3 1 0 4]

Introduction to Operating systems - Operating System Services, Operating system Structure, System calls, Process management - Process concept, Threads, Inter-process communication, CPU Scheduling, Process synchronization, Handling deadlocks – Deadlock Characterization, Deadlock Detection, Prevention, Avoidance and Recovery, Memory management - Main memory, Swapping, Contiguous Memory Allocation, Paging, Segmentation, Virtual memory – Demand Paging, Page Replacement, Thrashing, Allocating Kernel Memory, Storage Management- File management, Disk scheduling, Case study on Unix based Operating system – Design Principles, Kernel Modules, Basic concepts of Real time operating systems – Classification of Real Time Systems, Microkernels, Scheduling.

References:

1. Silberschatz A., Galvin P.B. & Gagne G., Operating System Concepts (9e), Wiley, 2012.
2. Stallings W., Operating Systems: Internals and Design Principles (9e), Pearson, 2017.

4. Mall R., Real time systems: Theory and Practice (2e), Pearson, 2009.

ICT 2263: ALGORITHM LAB [0 0 3 1]

Graphs: Finding a Path, cycle. Greedy Method: 0/1 Knapsack Problem, Dijkstra's Algorithm, Minimum spanning tree using Prim's/Kruskal's Algorithm. Divide and Conquer Method: Merge Sort, Quick Sort, Strassen's Matrix multiplication method, Binary Search, Closest Pair of points. Dynamic Programming: Matrix Multiplication Chain Problem, 0/1 Knapsack problem, All pairs shortest path. Backtracking/Branch and Bound: Travelling sales person problem, 0/1 Knapsack Problem. Approximation Algorithm: Travelling sales person problem, Vertex cover problem.

References:

1. Cormen T. H., Leiserson C. E., Rivest R. L., Stein C, Introduction to Algorithms (3e), Prentice- Hall India, 2009.
2. Sahni S., Data Structures, Algorithms and Applications in C++ (2e), Silicon Press, 2005.

ICT 2264: MICROPROCESSOR SYSTEMS LAB [0 0 3 1]

Assembly language programs related to memory access – Block transfer, Addition, Subtraction, Multiplication, Division, Unpacked BCD arithmetic, Packed BCD arithmetic, Sorting, Searching, Code conversion, GCD, LCM, Recursive functions, Programs using DOS and BIOS interrupts to input from keyboard and display, Programs using string instructions, Menu driven programs, Programs using Video RAM.

References:

1. Hall D.V., Microprocessors and Interfacing: Programming and Hardware (2e), Tata McGraw Hill, 2006.
2. Brey B.B., The Intel Microprocessors: 8086 to Pentium Pro -

Architecture, Programming and Interfacing (8e), Prentice Hall of India, 2012.

4. Rafiquzzaman M and Rajan C., Modern computer Architecture, Galgotia Publications Pvt. Ltd, 2012.

ICT 2265: OPERATING SYSTEMS LAB [0 0 3 1]

UNIX based operating system commands, executing shell scripts, inter process communication using system calls, implementing CPU scheduling algorithms, memory and deadlock management.

References:

1. Blum R. & Bresnahan C., Linux Command Line Shell Scripting Bible (3e), Wiley, 2015.
2. Silberschatz A., Galvin P.B. & Gagne G., Operating System Concepts (9e), Wiley, 2012.

FIFTH SEMSTER**HUM 3152 : ESSENTIALS OF MANAGEMENT [2 1 0 3]**

Definition of management and systems approach, Nature & scope. The functions of managers. Corporate social responsibility. Planning: Types of plans, Steps in planning, Process of MBO, How to set objectives, Strategies, policies & planning premises. Strategic planning process and tools. Nature & purpose of organising, Span of management, Factors determining the span, Basic departmentation, Line & Staff concepts, Functional authority, Art of delegation, Decentralisation of authority. HR planning, Recruitment, Development and training. Theories of motivation, Special motivational techniques. Leadership- leadership behaviour & styles, Managerial grid. Basic control process, Critical control points & standards, Budgets, Non-budgetary control devices. Profit & loss control, Control through ROI, Direct, Preventive control. Managerial practices in Japan & USA, Application of Theory Z, The nature & purpose of international business & multinational corporations, Unified global theory of management. Entrepreneurial traits, Creativity, Innovation management, Market analysis, Business plan concepts, Development of financial projections

3. Peter Drucker., The Practice of Management, Harper and Row, New York 2004.

ICT 3156: CYBER SECURITY [3 0 0 3]

Introduction to Computer Security, Toolbox: Authentication, Access Control and Cryptography, Programming Insights- Non-malicious programs, Malicious Programs, Viruses, Worms, Trojans, Countermeasures, Hacking- Basics of hacking, Phishing, Brute Force Attack, Denial of Service, Distributed Denial of Service Attacks, Penetration Testing, Bots and Botnets, Attacks on The Web, Operating Systems and Networks, Security Countermeasures- Browser Encryption, Onion Routing, IP Security Protocol Suite (IPsec), Virtual Private Networks, Firewalls, Intrusion Detection and Prevention Systems, Network Management, Incidents, Ethics, Case Studies on Cyber Crime and Cyber Terrorism.

References:

5. Singer P. W. and Friedman A., Cybersecurity and Cyber war- What Everyone Needs to Know, Oxford.

ICT 3157: DATABASE SYSTEMS [3 0 0 3]

Introduction to database system, Database users, Database architecture, Relational database, Keys, Schema, Formal relational query language, SQL basics, Constraints, Intermediate SQL, Joins, Nested queries, Advanced SQL, Functions, Procedures, Triggers, High level data modelling using entity relationship model, Relational database design, Notion of functional dependencies, Normalization, Transaction management, ACID properties, Serializability, Concurrency control, Locking, Deadlock handling, Unstructured database, Introduction to NoSQL, Basics of document-oriented database, MongoDB.

References:

1. Silberschatz A., Korth H. F., Sudarshan S., Database system concepts (6e), McGraw-Hill, 2013.
2. Elmasri, Ramez, Navathe S., Fundamentals of database systems (7e), Pearson, 2016.

4. Chodorow K., MongoDB: The definitive guide (2e), O'Reilly, 2013.

ICT 3158: EMBEDDED SYSTEMS [3 1 0 4]

An overview of ARM-Cortex- M Architecture, CISC versus RISC, The RISC and ARM design philosophy, ARM addressing modes, Data transfer instructions, Arithmetic and logical instructions, Shift and rotate instructions, Branch and conditional branch instructions, Function call and return, Stack, Recursive functions, Conditional execution, Assembly language programming, Input/output I/O) programming, Timer/counter programming, I/O interfacing - LED, LCD, Keyboard, Stepper motor, ADC, and DAC, PWM, UART, Hardware and software synchronization, Multithreading, Nested Vectored Interrupt Controller (NVIC), External hardware interrupts, IO interrupts, SysTick interrupts.

5. Joseph V., A definitive Guide to ARM Cortex-M3 and Cortex-M4 processors (3e), Elsevier, 2014.

ICT 3159: SOFTWARE ENGINEERING [3 1 0 4]

Introduction to Software Engineering, Process Models- Agile Process Model, Requirement Engineering, Requirement Modeling- Scenario and Class based modeling, Design models and methodologies, Architectural and Design Patterns, Software Testing Strategies and Testing Techniques, Software Configuration Management and Risk Management, Introduction to Project Management- basics of product metrics, planning and scheduling.

References:

1. Pressman R. S., Software Engineering A practitioner's approach (8e), McGraw Hill, 2014.

3. Sommerville I., Software engineering (10e), Pearson Education, 2017.

ICT 3163: DATABASE SYSTEMS LAB [0 1 3 2]

Basics of Visual C# for GUI design and control, Data Definition Language, Basic database query operations, Nested subqueries, Join Operations, Views, Stored procedures, Functions, Trigger, Cursors, Transaction control queries, Data Access from Visual C#, Introducing NoSQL-MongoDB ,Design and development of application based on database concepts.

5. MongoDB, MongoDB Tutorials, Available : <https://docs.mongodb.com/manual/tutorial/> [Online]

ICT 3164: EMBEDDED SYSTEMS LAB [0 0 3 1]

Familiarization of data transfer from code segment to data segment and from data segment to data segment, Arithmetic operations, Logical instructions, Branch instructions, Code conversion from hexadecimal to decimal and decimal to hexadecimal, Packing and unpacking of ASCII digits, Sorting using selection sort and bubble sort techniques, Searching using linear and binary search techniques, Recursion, I/O interfacing of LEDs, LCD, keyboard, 7 segment display, Stepper motor, DAC and ADC, PWM. In addition to the above list of experiments, students are required to develop a mini project.

SIXTH SEMESTER

HUM 3151: ENGINEERING ECONOMICS AND FINANCIAL MANAGEMENT [2 1 0 3]

Nature and significance, Micro & macro differences, Law of demand and supply, Elasticity & equilibrium of demand & supply. Time value of money, Interest factors for discrete compounding, Nominal & effective interest rates, Present and future worth of single, Uniform gradient cash flow. Bases for comparison of alternatives, Present worth amount, Capitalized equivalent amount, Annual equivalent amount, Future worth amount, Capital recovery with return, Rate of return method, Incremental approach for economic analysis of alternatives, Replacement analysis. Break even analysis for single product and multi product firms, Break even analysis for evaluation of investment alternatives. Physical & functional depreciation, Straight line depreciation, Declining balance method of depreciation, Sum-of-the-years digits method of depreciation, Sinking fund and service output methods, Introduction to balance sheet and profit & loss statement. Ratio analysis - Financial ratios such as liquidity ratios, Leverage ratios, Turn over ratios, and profitability ratios.

ICT 3253: DATA WAREHOUSING AND DATA MINING [3 0 0 3]

Introduction to Data mining- Technologies, applications, Major issues in data mining, Data objects & attribute types, Statistical descriptions of data, Data visualization, Data pre-processing-data cleaning, data integration, data transformation, data reduction, data discretization, Data warehouse modeling, Data warehouse design and usage, Data

warehouse implementation, Association rule mining techniques- Apriori algorithm, Partition algorithm, Pincer Search algorithm, FP Tree Growth algorithm, PC tree algorithm, Dynamic Itemset Counting algorithm, Multilevel association rules, Classification and prediction techniques- Decision Tree Induction, Bayes Classification Methods, Techniques to Improve Classification Accuracy, Clustering techniques- Partitioning Methods, Hierarchical Methods, Density-Based Methods, Outlier detection, Web mining.

References:

4. Bing L., Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (2e), Springer, Second Edition, 2011.

ICT 3254: DISTRIBUTED SYSTEMS [3 0 0 3]

Introduction, Distributed Systems Models, Challenges, Processes and Communication, External data representation, Case study - Unix inter process communication, Distributed objects, Remote procedure call, Case study: Java RMI, SUN RPC, Distributed File System, Naming Systems, Directory and discovery services, Case study: SUN NFS / GNS, Distributed Shared Memory, DSM implementation algorithms, Time and Global States, Logical and vector clocks, Coordination and agreement, Distributed transactions, Consistency and Replication Management, Fault Tolerance, Case Study - Google.

3. Singhal M., Shivaratri N., Advanced Concepts in Operating Systems (2e), McGraw Hill Education, 2017.
4. Andrew Tanenbaum S., Modern Operating System (3e), Pearson Education International, 2016.

ICT 3264: ADVANCED TECHNOLOGY LAB [0 0 3 1]

Introduction to the emerging technology (android, react native, etc.) used in the software industries, Understand the tools and techniques used to application development, Application user interface design, Backend database design, Implementation of mini project.

References:

1. McConnell S., Code Complete: A Practical Handbook of Software Construction (2e), Microsoft Press, Re-print 2015.

4. Holmes E. and Bray T., Getting Started with React Native, Packt Publishing Ltd, 2015.

ICT 3265: DATA WAREHOUSING AND DATA MINING LAB [0 1 3 2]

Data Pre-processing- Cleaning, Integration, Transformation, Reduction, Implementation of data warehouse on pre-processed data- Creating Physical data model, Creating data flow based on physical data model, Creating control flow- Sequential and parallel, Cube creation, Data mining solutions for real world problems- Implementing association algorithm, classification algorithm, clustering algorithm, Development of mini project.

References:

1. Han J. and Kamber M., Data Mining: Concepts and Techniques (3e), Morgan Kaufmann Publishers, 2011.

3. Silberschatz A., Korth H. F., Sudarshan S., Database System Concepts (6e), McGraw Hill Education, 2013.

ICT 3266: INTERNET TOOLS AND TECHNOLOGY LAB [0 1 3 2]

HTML, XHTML, Java Script, Introduction to Python Programming, Advanced Python programming concepts that include applications involving connection to databases; CGI Programming with Python; JSON and JQuery; NodeJS for client-side programming; Angular JS for server side programming; mini project.

References:

1. Deitel H. M., Deitel P.J. & Goldberg A.B., Internet & World Wide Web How To Program (5e), Pearson Education, 2011.
2. Bates C., Web Programming: Building Internet Application (3e), Wiley India, 2012.

SEVENTH SEMESTER

There are five program electives and one open elective with total of 18 credits to be taught in this semester.

EIGHTH SEMESTER

ICT 4298: INDUSTRIAL TRAINING

Each student has to undergo industrial training for a minimum period of 4 weeks. This may be taken in a phased manner during the vacation starting from the end of third semester. Student has to submit to the department a training report in the prescribed format and also make a presentation of the same. The report should include the certificates issued by the industry.

ICT 4299: PROJECT WORK/PRACTICE SCHOOL

The project work may be carried out in the institution/industry/ research laboratory or any other competent institutions. The duration of the project work shall be a minimum of 16 weeks which may be extended up to 24 weeks. A mid-semester evaluation of the project work shall be done after about 8 weeks. An interim project report on the progress of the work shall be submitted to the department during the mid-semester evaluation. The final evaluation and viva-voice will be conducted after submission of the final project report in the prescribed form. Student has to make a presentation on the work carried out, before the department committee as part of project evaluation.

PROGRAM ELECTIVES**CSE 4053: ARTIFICIAL INTELLIGENCE [3 0 0 3]**

Foundations of Artificial Intelligence, History of Artificial Intelligence, The

state of the Art. Agents and Environments, The concept of Rationality, The Nature of Environments, The structure of Agents. Problem Solving agents, Example Problems, Searching for Solutions, Uninformed search strategies, informed (Heuristic) search strategies, Heuristic functions. Games, Optimal decision in games, Alpha Beta Pruning Knowledge based agents, The Wumpus World, Logic, Propositional logic, Propositional Theorem Proving. Representation revisited, Syntax and semantics of First order logic, Using First order logic, Knowledge engineering in First order. Ontological Engineering, Categories and objects, Reasoning systems for categories, The internet shopping world. Acting under uncertainty, Basic probability notation, Baye's rule, representing knowledge in uncertainties, semantics of Bayesian networks.

4. Bishop C.M., Pattern Recognition and Machine Learning (2e), Springer, 2013.

CSE 4054: SOFT COMPUTING PARADIGMS [3 0 0 3]

Soft Computing, Artificial Intelligence, Soft-Computing Techniques, Expert Systems, Types of Problems, Modeling the Problem, Machine Learning, Handling Impreciseness, Clustering, Hazards of Soft Computing, Road Map for the Future . Artificial Neural Networks, The Biological Neuron, The Artificial Neuron, Multilayer Perceptron, Modeling the Problem, Types of Data Involved, Training, Issues in ANN, Example of Time Series Forecasting. Types of Artificial Neural Networks, Radial Basis Function Network, Learning Vector Quantization, Self-Organizing Maps, Recurrent Neural Network, Hopfield Neural Network, Adaptive Resonance Theory, Character Recognition by Commonly Used ANNs. Fuzzy Systems, Fuzzy Logic, Membership Functions, Fuzzy Logical Operators, More Operations, Fuzzy Inference Systems, Type-2 Fuzzy systems, Other Sets, Sugeno Fuzzy Systems, Example: Fuzzy Controller Evolutionary Algorithms: Evolutionary Algorithms, Biological Inspiration. Genetic Algorithms, Fitness Scaling, Selection, Mutation, Crossover, Other Genetic Operators, Algorithm Working, Diversity, Grammatical Evolution, Other Optimization Techniques, Metaheuristic Search, Traveling Salesman Problem. Introduction, Key Takeaways from Individual Systems, Adaptive Neuro-Fuzzy Inference Systems, Evolutionary Neural Networks, Evolving Fuzzy Logic, Fuzzy Artificial Neural Networks with Fuzzy Inputs, Rule Extraction from ANN, Modular Neural Network.

5. Jang J. S. R., Neuro-Fuzzy and Soft Computing, PHI 2003.

CSE 4051: AUGMENTED AND VIRTUAL REALITY [3 0 0 3]

Introduction of Virtual and Augmented reality, Definition and scope, A Brief History 3 I's of Virtual Reality A Short History of Early Virtual Reality, Early Commercial VR Technology, VR Becomes an Industry, Components of a VR System, Displays In augmented reality Multimodal Displays, Audio Displays Haptic, Tactile, and Tangible Displays, Displays, Visual Perception, Requirements and Characteristics, Multiple Models of I/O Gesture Interfaces Three-Dimensional Position Trackers, Navigation and Manipulation Interfaces, Gesture Interfaces. Output Devices, Haptic Display, Graphics Displays, Sound Displays. Computer Vision for Augmented Reality, Natural Feature Tracking by Detection, Incremental Tracking, Simultaneous Localization and Mapping, Outdoor Tracking, Computing Architectures for VR, The Rendering Pipeline, Workstation-Based Architectures, Distributed VR Architectures, Geometric Modeling, Kinematics Modeling, Physical Modeling, Behavior Modeling.

2. David A. F. and Ponce J., Computer Vision: A Modern Approach, PHI learning 2009.
3. Solem J. E., Programming Computer Vision with Python, O'Reilly, 2012.

CSE 4052: DIGITAL IMAGE PROCESSING [3 0 0 3]

Introduction, components of image processing system, Spatial domain transformations, histogram processing, smoothing, sharpening spatial filters, Filtering in the frequency domain- Introduction to Fourier transform, image smoothing, image sharpening using frequency domain filters. Image restoration- Noise models, restoration using spatial filtering, periodic noise reduction by frequency domain filtering, Morphological image processing- Preliminaries, dilation and erosion, opening and closing, hit-or-miss transformation, basic algorithms, extension to gray-scale images, Image segmentation- Point, line, and edge detection, Thresholding, Region Segmentation using Clustering and superpixels, Graph Cuts, morphological watersheds, motion in segmentation.

ICT 4034: BIG DATA ANALYTICS [3 0 0 3]

Understanding Big Data: Concepts and Terminology, Big Data Characteristics, Different Types of Data, Case Study Background. Big data and Hadoop: Understanding Hadoop features, Learning the HDFS and MapReduce architecture, Understanding Hadoop subprojects, Understanding the basics of MapReduce, Introducing Hadoop MapReduce, Understanding the Hadoop MapReduce fundamentals, Writing a Hadoop MapReduce example. Spark and Big Data: Theoretical concepts in Spark, Core components of Spark, The Spark architecture, Spark SQL, Spark Streaming. NoSQL databases: Need for NoSQL, NoSQL databases, In-memory databases, Columnar databases, Document-oriented databases, Key-value databases, Graph databases, Other NoSQL types and summary, Working on NoSQL systems using MongoDB. Applications: Implementation of machine learning algorithms using MapReduce and Spark.

ICT 4302: DESIGN AND DEVELOPMENT OF WEB APPLICATIONS [3 0 0 3]

Introduction to Internet and Web. Basic components of web page and fundamental concepts of languages required for Client side scripting and Server side scripting: HTML markup for structure of the simple page, text, creating links, adding images, table markup and forms. CSS for presentation: Orientation, formatting text, different selectors, colors background plus even more selectors, box model, padding, border, positioning, layouts, transitions, transformation and animation. Java script data types, control structure, DOM, arrays, objects, event handling. PHP introduction, control statements, arrays, objects, functions, connecting to MySQL data base.

ICT 4306 CYBER SECURITY [3 0 0 3]

Introduction to Information, Network and System Security, Encryption techniques, Message Integrity and Message Authentication, Digital Signature, Key Management, User Authentication. Web security model: Browser security model including same-origin policy, Client-server trust boundaries, Session management, authentication: Single sign-on, HTTPS and certificates. Application vulnerabilities and defenses: SQL injection, XSS, CSRF. Client-side security: Cookies security policy, HTTP security extensions, Plugins, extensions, and web apps, Web user tracking, Server-side security tools, e.g. Web Application Firewalls (WAFs) and fuzzers. Cybercrime, Cybercrime investigation, Laws and ethics

MCA 4302: INTRODUCTION TO VR AND AR TECHNOLOGIES [3 0 0 3]

Introduction: Input Devices, Output Devices, Displays, Computing Architectures for VR, The Rendering Pipeline, PC Graphics Architecture, Workstation-Based Architectures, Distributed VR Architectures, Modeling, Geometric Modeling, Physical Modeling, Behavior Modeling, Model Management, VR Programming and other Toolkits. Introduction to Unity 3D Engine, 2D Game concepts and basic scripting, 3D Game concepts and environment creation, Advanced game concepts. Introduction to Unity AR: Foundation and Vuforia, working with Vuforia in Unity, ARCore in unity, Mini project on AR. Introduction to VR, Unity for Google cardboard, Basic VR app development for Cardboard, Develop for a specific VR platform.

References:

MCA 4303: INTRODUCTION TO LINUX AND SHELL SCRIPTING [3 0 0 3]

Introduction to UNIX/LINUX Operating System: OS concepts, Linux overview, key features of Linux, pros and cons of Linux. Processes: Processes and Files, I/O redirection and pipes, process creation, process attributes standard process file descriptors. File and Process

commands. File systems: Files and directories, file naming and wildcards, file attributes, file permissions. Regular Expressions & filters: find, grep, cut, sort, grep patterns. AWK and SED. Shell and Shell Scripting: The need for shell, types of shells, interactive uses of shell, using shell for creating user commands, functions. Bash shell features: Statements, data structure, built-in commands, environment customization primitives. Linux Editors.

5. Brian W Kerningham and Rob Pike. The Unix Programming Environment, PHI Learning Pvt. Ltd., 2009.

MCA 4304: INTRODUCTION TO DATA ANALYTICS [3 0 0 3]

Introduction - data science, need for analytics, steps in data analysis projects, Data- sources of data, data sets, data warehouses, data types, privacy and confidentiality, samples vs. population. Data summarization and visualization – tables and graphs. Data Preprocessing- cleaning, transformation, dimensionality reduction. Data Analysis and Visualization – descriptive, inferential statistics, uni-variate and multi-variate analysis. Grouping – Cluster Analysis- distance measures, partitioning, hierarchical, density based methods. Market Basket Analysis, Association Analysis, Market Basket Analysis. Classifiers- Bayesian, k-nearest neighbor, neural network, Support Vector Machine, Decision Trees. Prediction- Regression models, Evaluating Classification and Predictive performance, ensemble methods. Anomaly Detection. Forecasting models.

5. Pang-Ning Tan, Michael Steinbach, Vipin Kumar, Introduction to Data Mining, Pearson Addison Wesley, 2005.

Minor Specialization: Computational Mathematics

MAT 4051: APPLIED STATISTICS AND TIME SERIES ANALYSIS [2 1 0 3]

Stochastic and deterministic dynamic mathematical models – forecasting and control, transfer function models, models for discrete control systems. Basic ideas in model building- linear and multiple linear regression. Basic concepts in stochastic processes and Markov chains, Mean square distance, mean square error prediction, prediction of covariance stationary process, ergodic theory and stationary process, applications of ergodic theory, spectral analysis of covariance stationary processes, Gaussian systems, stationary point processes, level crossing problems. ARIMA models, Autoregressive models, moving average models, duality, model properties, parameter estimates, forecasts. Volatility models: ARCH and GARCH modelling, testing strategy for heteroscedastic models, volatility forecasts, Black Scholes model.

MAT 4052: COMPUTATIONAL LINEAR ALGEBRA [2 1 0 3]

Matrix Analysis: Basic Ideas from Linear algebra, vector norms, matrix norms, orthogonality and SVD, Projections and CS decomposition, the sensitivity of square linear systems. General Linear Systems: Triangular systems, The LU factorization, Round off analysis of Gaussian elimination, Pivoting, Improving and estimating accuracy. Orthogonalization and least squares: Householder and Givens matrices, The QR factorization, The full rank LS problem, Other orthogonal factorizations, The rank deficient LS problem, Weighing and iterative improvement, square and underdetermined systems. The symmetric Eigen value problem: Eigen values properties and decompositions, Power iterations, the symmetric QR algorithm, Jacobi methods, Tridiagonal Methods, Computing the SVD, some generalized eigen value problems.

MAT 4054: GRAPHS AND MATRICES [2 1 0 3]

Graphs and subgraphs, walks, paths and connectedness, distance as a metric, degrees, regular graphs, cubic graphs, bipartite graphs, self-complementary graphs, operations on graphs, extremal graphs, cut points, bridges and blocks, block graphs and cut point graphs. Trees and their characterizations, centres and centroids, block-cut point trees, spanning trees, independent cycles and cocycles, connectivity and line connectivity, graphical variations of Menger's theorem. Traversability: Eulerian graphs and Hamiltonian graphs. Line graphs and total graphs. Line graphs and traversability, coverings and independence, critical points and lines. Planarity: Plane and planar graphs, outer planar graphs, Kuratowski's theorem, vertex colouring. Incidence Matrix: Rank, minors, path matrix, 0-1 incidence matrix. Adjacency Matrix: Eigen values of some graphs, determinant, bounds, energy of a graph, antiadjacency matrix of a directed graph, non-singular trees. Laplacian Matrix: Basic properties, computing Laplacian eigen values, matrix tree theorems, bounds for Laplacian spectral radius, edge-Laplacian of a tree.

OPEN ELECTIVES

MAT 5301: APPLIED GRAPH THEORY [2 1 0 3]

Graphs and applications of the theorems by Havel and Hakimi, Erdos and Gallai. Cut points, bridges and blocks, block graphs and cut point graphs. Trees and their characterizations, centre and centroids, block-cut points trees, spanning trees, independent cycles and cocycles, connectivity and line connectivity, Whitney's theorem. Traversability-Eulerian, Hamiltonian, line graphs and total graphs. Traversability, coverings and independence, theorem of Gallai, critical points and lines. Planarity, genus, thickness, crossing number. Colorability, chromatic number and its bounds, Nordhaus Gaddum theorems, the four and five colour theorems, chromatic polynomial. Matrix Representation -Incident matrix, Adjacency matrix, cycle matrix, cutset matrix, path matrix, Digraphs, Matrix - tree theorem on number of spanning trees. Tournament. Graph theoretic Algorithms: Computer representation of graphs-Input and output, Algorithms for connectedness, Spanning Tree, Fundamental Circuits, Directed Circuits and Shortest paths.

MAT 5302: APPLIED LINEAR ALGEBRA [2 1 0 3]

Finite dimensional vector spaces, subspaces, linear independence, basis and dimension. Sum and intersection of subspaces. Algebra of linear transformations, range and null space of a linear transformation, Inner-product spaces, metric spaces and Banach spaces, Gram Schmidt orthogonalization, linear operators and their adjoint, self adjoint, unitary and normal transformations, polar decomposition. Matrix algebra, simultaneous equations, Eigen values, characteristic vectors, Cayley-Hamilton theorem, minimal polynomial, Application of eigen values to solve simultaneous difference and differential equations. Quadratic forms and their classification, constrained optimization. Some computational methods of linear algebra.

MAT 5303: APPLIED NUMERICAL METHODS [2 1 0 3]

Matrix Algebra : Solution for linear system of equations – Direct methods: Gauss elimination method, Gauss Jordan method, Crout's (LU decomposition) method. Iterative methods, Jacobi Gauss Seidel and successive over relaxation methods. Computation of inverse of a matrix: Jordan method, Triangularization method, Choleski's method, partition method. Eigen value & Eigen vectors: Given's method for real symmetric matrices, Jacobi's method for real symmetric matrices, Power method. Numerical Solution of Ordinary Differential Equations: Single step methods, Runge-Kutta method, Adam Bashforth's predictor corrector method, Milne's predictor and corrector method. Numerical Solution of Partial Differential Equations: Finite difference approximation to derivatives of Parabolic, Elliptic. Explicit finite difference method, implicit method.

MAT 5304: MATHEMATICAL MODELLING [2 1 0 3]

Introduction, Techniques, classification and characteristics of mathematical models, mathematical modeling through algebra, ordinary differential equations of first order. Mathematical modeling through systems of ordinary differential equations of first order, Prey-Predator model Mathematical modeling through systems of ordinary differential equations, modeling in medicine A model for diabetic mellitus. Modelling

on population dynamics Mathematical modelling through difference equations. Some simple models. Modelling of economics and finance through difference equations, population dynamics and generation of models through difference equations, modeling in probability theory, examples. Optimization models: Mathematical modeling through linear programming. Mathematical modelling through graphs: elements of graphs, digraphs. Mathematical models for blood flow. Mathematical model for Peristaltic transport of two layered.

3. Hamdy A. Taha - *Operations Research* PHI

MAT 5306: STOCHASTIC PROCESSES AND RELIABILITY [2 1 0 3]

Static probabilities: Review and prerequisites generating functions, difference equations. Dynamic probability: definition and description with examples. Markov chains, transition probabilities, Chapman Kolmogorov equations. Classification of states, chains of Markov process. Stability of Markov systems, limiting behaviour, random walk. Poisson Processes : assumptions and derivations, related distributions, birth and death processes. Queueing System, general concepts, Model M/M/1 and M/M/S, steady state behaviour, transient behaviour. Wiener processes and Gaussian processes. Differential equations of a Wiener process, Kolmogorov equations, Ornstein - Unlenbeck Process. White noise. Reliability Theory : Definition of Reliability, types of failure, Hazard rate, Laws of failure - normal, exponential & Weibull failure laws - System reliability - in series, in parallel series - parallel system, Parallel - series system & related problems.

3. A Papoulis, *Probability, Random Variables and Stochastic Processes*, McGraw Hill.

Minor Specialization: Business Management

HUM 4051: FINANCIAL MANAGEMENT [2 1 0 3]

Introduction and objectives of financial management, Evolution of corporate finance, responsibilities. Types of accounts, Golden rules of accounting, Preparation of Journal, Ledger, Trial balance and final accounts. Sources of long term finance, Characteristics of equity capital, Preference capital, Debenture capital & Term loans. Valuation of securities, Concepts, Bond valuation and related models, Bond value theorems, Yield to maturity. Equity valuation; Dividend capitalization approach, Leverage, Operating leverage, Financial leverage, Total leverage, Indifference point analysis. Working capital management, Capital budgeting: appraisal criteria, pay-back period, Average rate of return, Net present value, Benefit cost ratio and Internal rate of return. Risk analysis in capital budgeting, Cost of capital: introduction, cost of debt capital, Preference capital and Equity capital, Weighted average cost of capital, Determination of proportions, Cash management, Dividend decisions.

HUM 4052: HUMAN RESOURCE MANAGEMENT [2 1 0 3]

Introduction, Scope of HRM, Objectives of HRM, Functions, Activities, Roles, HRD organization and responsibilities. Evolution of HRM, Influence of various factors on HRM. Human resource planning: Introduction, Strategic considerations, Nature and scope, Human Resources Inventory, Job analysis, Job design, Job description, Job specification and Job evaluation. Employee Recruitment & Selection: Policy, Process, Tests, modern methods, Interview, Provisional selection, Medical/Physical examinations, Placement, Induction programs and socialization. Training and development: Basic concepts, Employees training Process, Planning, Preparation of trainees, Implementation, Performance evaluation and Follow-up training. Competency Mapping and Career development programmes. Performance appraisal and Merit rating, Promotion, transfers and separations, Wages and salaries administration, Discipline and grievances. Industrial and labour relations and Trade Unionism Overview: Collective bargaining and maintaining Industrial health.

HUM 4053: MARKETING MANAGEMENT [2 1 0 3]

Marketing definition, scope and concepts, Adapting marketing to the New Economy, Marketing strategic planning. Market Demand, Marketing Environment, Marketing Information System, Marketing Research. Segmentation, Targeting and Positioning, Buying Behaviour: Consumer Markets and Business Markets, Competition: Identifying competitors, analysing competitors. Product Life Cycle: Product life-cycle marketing strategies. New Market Offerings: New product development and challenges, Branding. Designing and Managing Services, Price Strategies, Retailing, Wholesaling, Integrated Marketing Communications, Digital Marketing and Trends, International Marketing

HUM 4054: OPERATIONS MANAGEMENT [2 1 0 3]

Introductions to operations management – process view and supply chain view, types of production activities, competitive priorities and capabilities. Break-even analysis, evaluating services or products, evaluating processes - make or buy decision, decision making under risk, and decision trees. Introduction to forecasting, importance and uses of forecasting, demand patterns, demand management options, judgement methods, causal methods - linear regression, time series method – naïve method, moving average, weightage moving average, and exponential smoothing curve. Planning long-term capacity, measures of capacity and utilization, economies of scale, diseconomies of scale, capacity timing and sizing strategies, sizing capacity cushions, timing and sizing expansion – expansionist strategy, wait and see strategy, and a systematic approach to long term capacity decision. Levels in operations planning and scheduling across the organization, sales and operation planning strategies- chase strategy, level strategy, operations planning using linear programming technique, scheduling job and facility scheduling, and work for scheduling. Theory of constraints, managing bottle necks in manufacturing and service processes, identifying bottle necks, relieving bottle necks, drum buffer rope system, and managing constraints in a line system. Supply chain design across the organization, supply chains for services and manufacturing, measures of supply chain performance - inventory measures, financial measures, inventory and supply chains - pressures for small inventories, pressures for large inventories, types of inventory, inventory reduction tactics, and inventory placement. Costs of quality, total quality management, acceptance sampling, statistical process control - control charts, and process capability. Continuous improvement using lean systems, different types of wastes, strategic characteristics of a lean system, designing lean system layout, and Kanban system.

OPEN ELECTIVES

HUM 4301: COMMUNICATIVE ENGLISH [3 0 0 3]

(Offered for Lateral Entry Students only)

Common Errors in English: Subject Verb Agreement; Uses of Tenses / Sequence of Tense; Prepositions; Articles; Special Usages; Creative Writing Essay: Types of Essays, Argumentative Essay, Descriptive/ Expository/Narrative Essays; Reading Comprehension; Dynamic text; Critical Evaluation; Group Discussions; Presentation Skills; Essay writing.; Audio texts/speeches -Practice listening skills- summary, commentary, listening exercises. Video Speeches -Theme based speeches - motivational, informative, technical, and persuasive, discussions. Speech - Elements of a good speech, types of speeches, model speech, Speech exercises, individual presentations, peer and facilitator feedback. Formal/Informal communication. Communication Styles- formal and informal, standard English and variations in usages, examples and analysis of faulty usages; Correspondence: formal/informal letters and emails.

HUM 4303: GERMAN FOR BEGINNERS [3 0 0 3]

Text selections, dialogue and exercises which have been designed to give the absolute beginner grounding in the rudiments of the German language, as well as providing background information about the history, life and culture in Germany. Introduction to the German alphabet and the German language – dialogues & conversations – pronunciation, basic vocabulary lists - key points of grammar - background information about the history and culture of Germany - exercises on vocabulary, grammar and German culture - reading & listening comprehension.

HUM 4306: PUBLIC SPEAKING [3 0 0 3]

Public Speaking -Introduction to Public speaking- Voice modulation, Sounds/accent (basics), Articulation, Anxiety management, Logical arguments, Concept of purpose, Audience, Smart use of Body language. Types of speech-Informative speeches - designing and delivery- Persuasive speeches – designing and delivery- Impromptu speeches – designing and delivery -Special occasion speeches- designing and delivery, Presentations - planning and execution -Types of presentation - Informative-Planning and delivery - Persuasive - Planning and delivery - Motivational - Planning and delivery, Other forms of speaking – Debates, Seminars, Panel Discussion, Group Discussion, Tall Tales, Turn Coat, Art of Evaluation-Providing feedback- planning, designing and delivering constructive feedback - Receiving feedback – making use of relevant feedback -Techniques of providing feedback- Speech analysis –Role of the Evaluator.

HUM 4307: INTRODUCTION TO PSYCHOLOGY [3 0 0 3]

Psychology - Meaning, Nature and Scope, Defining Psychology, Meaning of the term Behavior, Nature of Psychology, Scope of Psychology: Branches and fields of Psychology. Development of Psychology - Historic Sketch of Psychology, Modern Age of Psychology, Gestalt Psychology, Psycho Analysis, Contemporary Psychology. Systems of Psychology- The Nervous System, Nature V/s Nurture, Sensation and perception, States of Consciousness. Methods of Psychology - Classical Conditioning, Introspection Method, Naturalistic Method, Experimental Method, Differential Method, Clinical Method, Psycho Physical Method. Personality- Personality types, Personality Disorders, Abnormal psychology, Treatment of personality disorders. Thinking - Nature of Thinking, Types of Thinking, Language and Intelligence. Discussion, Presentation and Assignments.

HUM 4309: CREATIVE WRITING [3 0 0 3]

Various literary/prose forms and their characteristics; techniques and strategies for reading; nuances of language and meaning in reading and writing; Writing Exercises - techniques and strategies of writing creatively; Critical Concepts and Terms in Literary Writing; Writing Exercises; creative writing output.

References:

1. Milan Kundera ., *The Art of the Novel*.
2. The Art of Fiction: Illustrated from Classic and Modern Texts, David Lodge

HUM 4310: GRAPHIC NOVELS: HISTORY, FORM AND CULTURE [3 0 0 3]

Part I: The History of Comic Books, Part 1: Developing a Medium Defining comic books as a medium-Relationships between comic books and other forms of sequential art-The (continental) roots of comics as an art form -The ways in which comic strips and pulps contributed to the emergence of the comic book. The History of Comic Books, Part 2: The Maturation of the Medium-Influence of underground movement, ways in which mainstream publishers began to address more relevant topics, proliferation of independent comics, the increase in the profile and prominence of the medium due to ambitious projects. Part II: Creating the Story: Graphic Storytelling and Visual Narrative-Some narrative structures commonly found in comic books -The types and techniques of encapsulation-The nature of the relationship between the pictorial and linguistic elements of comic books Experiencing the Story: The Power of Comics - About diegetic images that show the world of the story-About interpretive images that comment on the story-The impact art style has on the emotional reactions of the reader; and how the meaning of each image is affected by the relationship to other images in that particular book, in other texts, and in the reader's personal experience-Part III: Comic Book Genres-the definition of genre and the role it plays in shaping the creation of comics products- the characteristics of genres, including character types, narrative patterns, themes, and other conventions-how the example genres of teen humor, romance, funny animals, horror, and memoir developed in comics, and what characterizes each-how the hybridization of genres helps experimentation and expansion of narrative possibilities.

HUM 4311: MANAGEMENT INFORMATION SYSTEMS [3 0 0 3]

Management information system: Introduction to management, information and system. System concepts, general model of a system and types of systems. Evolution of MIS, models and resources used in the MIS model. Structure of MIS, operating elements of an information system, synthesis of the structure. Information systems for different applications: Transaction processing systems, Human resource management systems and Marketing-application areas. Production planning and Office automation systems. Role of management information in decision making: Concepts of decision making, Decision making process and information needs at different levels of management. Herbert. A. Simon model. Phases in the decision making process, Programmed vs non-programmed decisions, General model of human as an information processor, Allen Newell Simon model. Decision support systems -structure, elements and working. Information as a strategic resource. MIS as a technique for making programmed decisions: Behavioral models of the decision maker and methods. MIS support for decision making. Role of MIS in Organizations -recent trends and e-commerce applications. Development of customized management information system approaches: SDLC -phases in SDLC, Strategic and project planning for MIS, conceptual design and detailed design phases: general business planning and MIS response. MIS Planning and planning cycle. Conceptual system design and Detailed System design. MIS System Implementation, and Pit falls: Pit Falls in MIS development, Fundamental weaknesses, soft spots in planning, design problems and review.

HUM 4312: ENTREPRENEURSHIP [3 0 0 3]

Entrepreneur: Meaning of entrepreneur, evolution of the concept, functions of an entrepreneur, types of entrepreneur, and intrapreneur. Concept of entrepreneurship - evolution of entrepreneurship, development of entrepreneurship, stages in entrepreneurial process, role of entrepreneurs in economic development, entrepreneurship in India, barriers for entrepreneurship. Small scale industry: Definition, characteristics, need and rationale. Objectives, scope, role of Small Scale Industries (SSI) in economic development, advantages of SSI, steps to start an SSI - government policy towards SSI, different policies of SSI, impact of liberalization, privatization, and Globalization. Effect of WTO/GATT and supporting agencies of government for SSI. Institutional support: Different Schemes: TECKSOK, KIADB; KSSIDC; KSMC; DIC Single Window Agency: SISI, NSIC, SIDBI, and KSFC, New schemes and support for start-ups and new venture under Govt. of India. Preparation of Business plan and project report: components of a successful plan. Meaning of project, project identification, project selection, project report, need and significance of report, contents, formulation, guidelines by planning commission for project report. Network analysis, errors in project report, project appraisal. Identification of business opportunities, market feasibility study, technical feasibility study, financial feasibility study and social feasibility study and documentation and evaluation.

Minor Specialization: Material Science

PHY 4051: PHYSICS OF LOW DIMENSIONAL MATERIALS [3 0 0 3]

Thin films: Thick and Thin Film Materials, preparation by physical and chemical methods. Thickness measurement techniques. Theories of nucleation - Capillarity and atomistic theory, effect of deposition parameters on nucleation and growth of thin films. Epitaxial growth. Reflection and Transmission at interface between isotropic transparent media. Reflectance and Transmittance in thin films. Antireflection coatings. Electrical conduction in discontinuous metal films - Quantum mechanical tunneling model. Conduction in continuous metal and semiconducting films. Thermoelectric power in metal films. thin film resistors, thermopiles. Quantum well devices.

Nanomaterials: Chemical Synthesis of Nanoparticles: Bottom up approach. Functionalized nanoparticles in different medium. Size control. Self assembly. Nanoparticle arrays. Semiconductor nanoparticles- synthesis, characterization and applications of quantum dots. Magnetic nanoparticles- assembly and nanostructures. Manipulation of nanoscale biological assemblies. Carbon nanotubes and fullerene as nanoclusters. Nanostructured films. Physical Methods of Nanostructure Fabrication: Top down approach. Nanopatterning- Lithography- Optical, X-ray and Electron beam lithography. Ion- beam lithography.

5. Nalwa H. S. (Ed), *Nanostructured Materials and Nanotechnology*, Academic, 2002

PHY 4052: PHYSICS OF PHOTONIC AND ENERGY STORAGE DEVICES [3 0 0 3]

Semiconductors: Direct and indirect band gaps. Carrier concentrations at thermal equilibrium. Fermi level. Degenerate and non-degenerate semiconductors. Semiconductor Crystal growth techniques Contact phenomenon- semiconductor-semiconductor, metal-semiconductor contacts. Schottky and Ohmic contacts. Preparation of semiconductor devices. IC technology, elements of lithography.

Photonic Devices: LED and semiconductor lasers: Radiative and non-radiative transitions, diode laser, population inversion, laser operating characteristics, efficiency, photoconductor, photodiode, avalanche photodiode, phototransistor, material requirement for solar cells, theory and types of solar cells.

Fuel cells: Hydrogen energy – merits as a fuel – production of hydrogen, Hydrogen Fuel cells – introduction – difference between batteries and fuel cells, components of fuel cells, principle of working of fuel cell, fuel cell stack, fuel cell power plant: fuel processor, fuel cell power section, power conditioner, Advantages and disadvantages of fuel cell power plant. Types of fuel cells. Application of fuel cells – commercially available fuel cells.

OPEN ELECTIVES

PHY 4301: FUNDAMENTALS OF ASTRONOMY AND ASTROPHYSICS [3 0 0 3]

Introduction to astronomy and astrophysics. Properties of ordinary stars: Brightness of starlight; the electromagnetic spectrum; Colours of stars; stellar distances; absolute magnitudes; HR diagram. Stellar evolution: Formation of star; the main sequence; stellar structure; evolution off the main sequence; planetary nebulae; white dwarfs. The death of high mass stars: Supernovae; neutron stars; pulsars; stellar black holes. Normal Galaxies: Types of galaxies; Dark matter in galaxies. Cosmology: The scale of universe; expansion of the universe; open or closed universe; the big bang; the cosmic background radiation; big bang nucleosynthesis. Astronomical instruments.

PHY 4303: RADIATION PHYSICS [3 0 0 3]

Radiation Sources: Fast electron sources-Heavy charged particle sources-Sources of electromagnetic radiation-Neutron sources. Radiation Interaction: Photoelectric and Compton process -pair production. Interaction of heavy charged particles-stopping power-Energy loss characteristics- Bragg curve-Particle range-range straggling- stopping time-energy loss in thin absorbers-Interaction of fast electrons-absorption of beta particles-interaction of gamma rays-gamma ray attenuation-Interaction of neutrons-neutron cross section-neutron induced nuclear reactions. Radiation Detectors and Instrumentation: Semiconductors diodes-JFET-MOSFET-Integrated Circuits-OPAMP and their characteristics-Differential Amplifier-Operational amplifier systems-Pulse Amplifiers. Principles of radiation detection and measurements-Gas filled detectors-Ionisation chambers-Proportional counters-GM counters-Scintillation detectors-Semiconductor detectors-Thermo luminescent Dosimeters-Radiation spectroscopy with scintillators-Gamma spectroscopy-Multichannel pulse analyzer-Slow neutron detection methods-Reactor instrumentation. Industrial uses of nuclear measurements: Radiation detection in industrial environments-Measuring systems for industrial problems-Determination of physical material characteristics by nuclear measurements-Level height determination-Density measurements-Quantity measurements-Thickness measurement-coating thickness measurement.

PHY 4304: SOLID STATE PHYSICS [3 0 0 3]

Review of Crystal structure: Lattice, basis and unit cell, crystal system, symmetry, crystal planes and miller indices, reciprocal lattice, Bragg's law, experimental methods of x-ray diffraction, types of crystal binding, analysis of stress and strain in crystals. Electrical conduction: Free electron gas model, Sommerfield quantum theory, Fermi energy, parameters of free electron gas at absolute zero, electrical conductivity, Drude-Lorentz theory and Sommerfield theory of electrical conductivity, Band theory of solids, electrical conduction in metals, insulators and semiconductors. Dielectrics: Static dielectric constant, polarization and polarizability, local field, ferroelectricity, piezoelectricity, frequency dependence of polarizability (electronic, ionic and dipolar), dielectric losses, requirements of insulating materials, applications of dielectric materials. Magnetism: Classification of magnetic materials, classical theory of diamagnetism and paramagnetism, Weiss theory of ferromagnetism, ferrites, hard and soft magnetic materials, garnets, magnetic bubbles, ceramic magnets, applications of magnetic materials

PHY 4305: MODERN OPTICS [3 0 0 3]

Optics: Review of geometrical and physical optics, Dual nature of light, Electromagnetic spectrum, Optical devices, mirrors, lenses, prisms, grating, beam splitters, zone plate, polaroids. Light sources, emission profile. Elements of lasers: Basic requirements in a laser, characteristic properties of lasers. Q-switched and mode locked lasers. CO₂, Nd: YAG lasers. Applications. Introduction to Non-linear optics. Optoelectronic devices and its application: Photo diodes, solar cells, LED, and diode lasers. DBR and DFB lasers, CCD. Optical Communication: Conceptual picture of the optical communication system, Modulation and Detection

Schemes, properties of optical fibers, discussion on device requirements, OEICS. Optical storage devices: Data recording and read out from optical discs. Holographic data storage systems.

PHY 4306: INTRODUCTORY QUANTUM MECHANICS [3 0 0 3]

Review of certain basics : Limitations of classical physics, wave-particle duality, De Broglie's hypothesis, matter as wavepacket, Heisenberg's uncertainty principle, Mathematical Formalism : operators; commutation relation; orthonormal functions; eigenvalues and eigenfunctions; the Dirac notation; the postulates of quantum mechanics. The Schrödinger Equation : Introduction, wavefunctions, time dependent Schrödinger equation, conservation of probability, expectation values, Ehrenfest's theorem, time independent Schrödinger equation, stationary states, Schrödinger equation in one dimension : the infinite square potential well; the finite square potential well; the potential barrier; tunneling; the harmonic oscillator. Quantum mechanics in three dimensions: Schrödinger equation in spherical coordinates, separation of variables, the angular equation, the radial equation, Applications (energy eigenvalues and eigenfunctions): the rigid rotator; the hydrogen atom; angular momentum. Identical Particles. Some applications of quantum mechanics in nuclear physics, condensed matter physics, and spectroscopy: alpha decay, nanostructures, STM, vibrational and rotational spectra of molecules etc.

Minor Specialization: Material Science

CHM 4051: CHEMICAL BONDING [3 0 0 3]

Introduction to bonding, Classification. Ionic bond- Lattice energy, Born Haber cycle, Radius-ratio rules, Properties of ionic compounds, Covalent character in ionic bonds. Covalent bond-Covalency, Valence bond theory, Sigma and pi bond, Hybridization, VSEPR Theory, Molecular orbital theory, Bond order, Properties of covalent compounds. Coordination bond - Primary and Secondary valencies, ligands, Valence bond theory of complexes, Crystal field theory of octahedral and tetrahedral complexes, Low and high spin complexes. Metallic bond-Band theory of metals, Conductors, semiconductors and insulators. Secondary bonding- Hydrogen bonding, London forces and dipole-dipole interactions.

OPEN ELECTIVES

CHM 4301: ANALYTICAL METHODS AND INSTRUMENTATION [3 0 0 3]

Spectroscopic methods of analysis: Properties of EMR, General features of spectroscopy, Types of molecular spectra, Interaction of EMR with matter, Instrumentation, Applications, Theory, Instrumentation and applications of Microwave, Raman, Infrared, UV-Visible, NMR spectroscopic techniques. Chromatographic Techniques: General

concepts, Classification, Principles, Experimental techniques of CC, HPLC, TLC, GC and their applications. Electroanalytical methods: Basic principles and applications of conductometric, potentiometric titrations.

CHM 4303: SUSTAINABLE CHEMICAL PROCESSES AND PRODUCTS [3 0 0 3]

Introduction and principles of green chemistry, Examples, Atom economy, carbon efficiency, life cycle analysis, sustainable products, process and synthesis catalysis and green chemistry, examples of fine and bulk chemicals production, catalysts for clean technology. Application of ecofriendly approach to waste treatment. Cleaner production processes, clean synthesis in lab Scale, industrial examples, use of ecofriendly energies. Bio-pesticides, polymers & pharmaceutical products. Electrochemical synthesis, Alternate reaction media using water and other green solvents, ionic liquids & supercritical fluids; phase transfer catalysis.

Inter Institute Open Electives

Centre for Creative and Cultural Studies (CCCS), Manipal

IIE 4301: ART APPRECIATION [3 0 0 3]

How to read a visual, how to enjoy or feel an art form, what is Creative Thinking? Indian Art: Heritage & Culture; Art Appreciation: Western Art, Artist & Art Movements: Raja Ravi Verma, Tagore, Da Vinci, Van Gogh; Aesthetics: Beauty, Feel & Expression; Art & Science; Art & Film; Art: Freedom & Society, to be an art literate. A journey to immerse in the world of Art.

IIE 4302: INDIAN CULTURE AND CINEMA - AN INTRODUCTION [3 0 0 3]

Introduction to Idea of Culture, Identity and tradition, Indian Cultural History, Indian cultural history, Time and space, Indian Art and heritage, Indus valley civilization – Indian Independence, Post-colonial India, Modern India, Indian Cinema, Body, language and feel, Film and culture, Evolution, Interpretation and Reflection, Indian Cinema, Media and the medium, Pioneers and classical films, Culture and art of cinema, Culture, Cinema and Society, Revolutions, ideas, innovations, Culture, Cinema and Peace, Message, purpose and the challenge.

Manipal Institute of Management, Manipal

IIE 4304: CORPORATE FINANCE [3 0 0 3]

Introduction to Corporate Finance, Financial Goal, Agency Problems, Managers vs Shareholders Goals, Concepts of Value and Return, Capital Budgeting Decisions, Cost of Capital, Calculation of the Cost of Capital in Practice, Financial and Operating Leverage, Capital Structure, Relevance of Capital Structure, Irrelevance of Capital Structure, Relevance of Capital Structure, Dividend Theory, Dividend Relevance, Dividend Relevance, Dividend and Uncertainty, Dividend Irrelevance, Principles of Working Capital Management.

Centre for Integrative Medicine & Research (CIMR)

IIE 4307: YOGA [3 0 0 3]

Aim, Objectives, Meanings and Definitions of Yoga, History of Yoga, Concepts and misconceptions of Yoga, Schools of Yoga, Ashtanga Yoga

Subjects by Industry Experts

IIE 4308: HEALTH ECONOMICS [3 0 0 3]

Economics: Understanding Economics, Efficiency, Rational decision making, Opportunity costs, Supply and demand, Price discovery, Health economics: Defining health, Human capital, what does supply and demand mean in the context of health? Arrow on the uncertainty and welfare economics, The Moral hazard, DALY and QALY, Efficiency: The Production possibility frontiers. The production function for health care. Health policy, Defining equity, Standards of healthcare provision Epidemiology, The Healthcare sector, The demand for health, Disease prevalence, The pharmaceuticals market, Cross country case studies.

3. Jeffery, Roger. The politics of health in India. University of California Press, 1988.

IIE 4309: DIGITAL MEDICINE [3 0 0 3]

Present day practice of medicine. Limitations of scalability in the present framework. Introduction to computing, algorithms, big data, semantic web, mobility. Communication-WAN/LAN, 3G/4G and 5G. Patient/Electronic Health records. Experience with these records elsewhere Wearables, the physics of data capture. Practical demonstration of wearables Genomics, an introduction. Computational genomics including the software. Imaging –an introduction-ionizing and non-ionizing. Imaging software and science of diagnosis. How all the four 4 pillars-PHR/EHR, Wearables, Genomics and Imaging come together with software as the glue to change the world of medicine.

Welcomegroup Graduate School of Hotel Administration, Manipal

IIE 4312: INDIAN CUISINE AND CULTURE PRACTICAL [3 0 0 3]

Introduction to Indian cuisine, Basic Indian gravies, Rice cooking, Preparation of various rice products, Tandoor Cooking, Indian sweets, Comfort Food, Regional and sub-regional cuisine.

IIE 4313: FOUNDATION COURSE IN BAKING AND PATISSERIE PRACTICAL [3 0 0 3]

Introduction to Patisserie and Baking Principles, Special emphasis placed on the study of ingredient functions, Students will have the opportunity to apply basic baking techniques, Understanding fundamentals of yeast dough production, Emphasis on the application of ingredient functions, product identification and recipe interpretation occurs

throughout the course, Pastry Basics and Pie dough, The fundamental production of classical European pastry based desserts are included, Techniques of Cake Making, Techniques of Cookie making, The course emphasizes the preparation and makeup techniques of various cookies.

IIE 4314: GLOBAL CUISINE & CULTURE- PRACTICAL [3 0 0 3]

European Cuisine: Familiarization of ingredients, recipes and preparation of different countries. North American Cuisine: Familiarization of ingredients, recipes and preparation of different countries. South American Cuisine: Familiarization of ingredients, recipes and preparation of different countries. Asian Cuisine: Familiarization of ingredients, recipes and preparation of different countries. Australian Cuisine: Familiarization of ingredients, recipes and preparation of different countries. African Cuisine: Familiarization of ingredients, recipes and preparation of different countries. Molecular Gastronomy: Additives, Tools, and Recipes. Processed Food: Comparison and Critiquing. Mediterranean and European cuisine: Familiarization of ingredients, recipes and preparation of different countries.

IIE 4316: INTRODUCTION TO ADVERTISING & PUBLIC RELATIONS [3 0 0 3]

Introduction to advertising; Evolution and history of advertising; Influence of advertising on society and ethics. Advertising as part of marketing mix; Structure and types of ad agencies; Advertising planning; creative strategy and implementation (media strategy). The essentials of advertising on different media platforms – print, broadcast, internet and new media; discuss the difference in planning and execution using examples or campaign case studies. Public Relations-scope; definition; evolution; establish difference between PR and advertising; Identifying stakeholders and various Public Relation tools. Steps in developing a PR program/campaign-stating the problem, planning and programming, action and evaluation; Crisis communication; Ethical issues in Public Relations.

IIE 4317: BASIC PHOTOGRAPHY [3 0 0 3]

Photo Journalism: History of Photography and Photo Journalism. Photo Journalism: Definition, Nature, Scope and Functions of Photo Journalism – Qualification and Responsibilities of Photo Journalists, News Photographers and News Value, Types and Sources. Selection, Criteria for News Photographs – Channels of News Pictures – viz., Wire, Satellite, Agency, Stock, Picture Library, Freelancer, Photo Editing, Caption Writing, Photo – Presentation. Legal and Ethical aspects of Photography – Professional Organizations – Camera – Components and Types of Camera – Types of Lens, Types of Films, Types of Filters – Importance of Light and Lighting Equipments – Camera Accessories – Picture appreciation. Digital Camera – Digital Technology and its future – Darkroom Infrastructure – Film developing and Printing

IIE 4318: MEDIA PRODUCTION TECHNIQUES [3 0 0 3]

Print design elements – typography, colours, spacing, pictures, logos, graphics, principles of layout and design – basic writing skills. Photography – SLR camera, Lenses, Apertures and Shutter speeds, Exposure, Understanding light, Filters and accessories, composing a picture, developing and printing, creating special effects. Digital photography – digital camera – digital technology and its future. Television – Introduction to AV Media-pre-production, production, post-production. Show packaging-Camera-characteristics, parts and

functions; Mounting accessories and movements. Shots-Types and Uses; Basic composition. Practical video recording process. Radio – Introduction to Radio-Microphone types, characteristics and uses; Cables and Connectors. Recording device-Types and Characters, Audio editing, Programme formats-news, drama, feature and PSA's and Advertising.

IIE 4319: GRAPHIC & SKETCHING [3 0 0 3]

Basic Art Principles: Element of Art & Design, Contour Drawing, Composition Principles, Pencil shading, creating geometry model and shading. Basic Perspective: Still life sketching & Drawing, Styles of shading, Introduction to colors, color still life painting, Layout Design, Creating concepts for Design. Skeleton System, Body Proportions, Upper Body, Lower Body, Back, Hands and Legs. Text: Human Anatomy by Victor Perard, Dynamic Anatomy by Burne Hogarth. Gesture Drawing Tips, Line of Action, Dynamic Poses, Body Weight and Gravity, Clothing. Text: Figure Drawing by Anthony Ryder.

List of Practical's:

- ▶ 10 Drawings of Human Anatomy Study In Pencil
- ▶ 50 Drawings of Gesture Drawing In Pencil
- ▶ 5 Contour Drawing
- ▶ 2 Still Life Pencil Shading
- ▶ 2 Color Still Life
- ▶ 2 Layout Design
